

JOURNEY

through the UNIVERSE

OCTOBER 6, 2009

Gemini Observatory Lecture Hall

In preparation for Journey 2010, held February 25 – March 5, 2010

9:00am – 11:00am

Teacher Workshop

Drs. Tim and Stephanie Slater will facilitate this interactive session designed to assist teachers with the development of engaging, standards-based learning activities for students. Teachers will preview the Journey curriculum materials for this year's theme, "Building a Human Presence in Space," and will discuss practical ways to integrate Space Science content with existing curriculum activities.

11:30am – 1:00pm

Lunch

Gemini Observatory will host an informal lunch for teachers and scientists participating in the scheduled workshop sessions. Participants will have the opportunity to interact and to become better acquainted in this informal, conversational environment.

1:15pm - 3:00pm

Astronomy Scientist Educators

Drs. Tim and Stephanie Slater will facilitate this workshop for astronomy science educators to share hands-on, inquiry based teaching strategies for classroom presentations in Journey 2010. Mentoring strategies for supporting students' interests in astronomy careers will also be introduced. This year's module "Building a Human Presence in Space," will be reviewed along with suggested classroom presentations for different grade levels.

PLEASE RESERVE YOUR SPACE WITH JANICE HARVEY jharvey@gemini.edu 974-2603
