

EXCELLENCE IN TEACHING ASTRONOMY

Galileo Teacher Training Workshop

October 3, 2009

8:30am-3:30pm

Description: In this daylong, hands-on teaching excellence workshop, participating teachers will be receiving classroom-ready curriculum materials and training to support teaching astronomy concepts addressed in the state standards. This workshop is part of the world-wide celebration of the 2009 International Year of Astronomy honoring 400 years of using telescopes for advancing astronomy.

About the Facilitators: Dr. Tim Slater is an internationally recognized science education professor from the University of Wyoming. Known for his high-energy seminars and innovative teaching approaches, this expert has worked with hundreds of teachers through hand-on teaching astronomy excellence workshops. Dr. Stephanie Slater completed her doctoral studies at the University of Arizona in 2008, where her research brought together findings from the cognitive sciences and astronomy education.

Location: NELHA, Administration Bldg, Conference Center the end of OTEC Rd.
(Map attached)

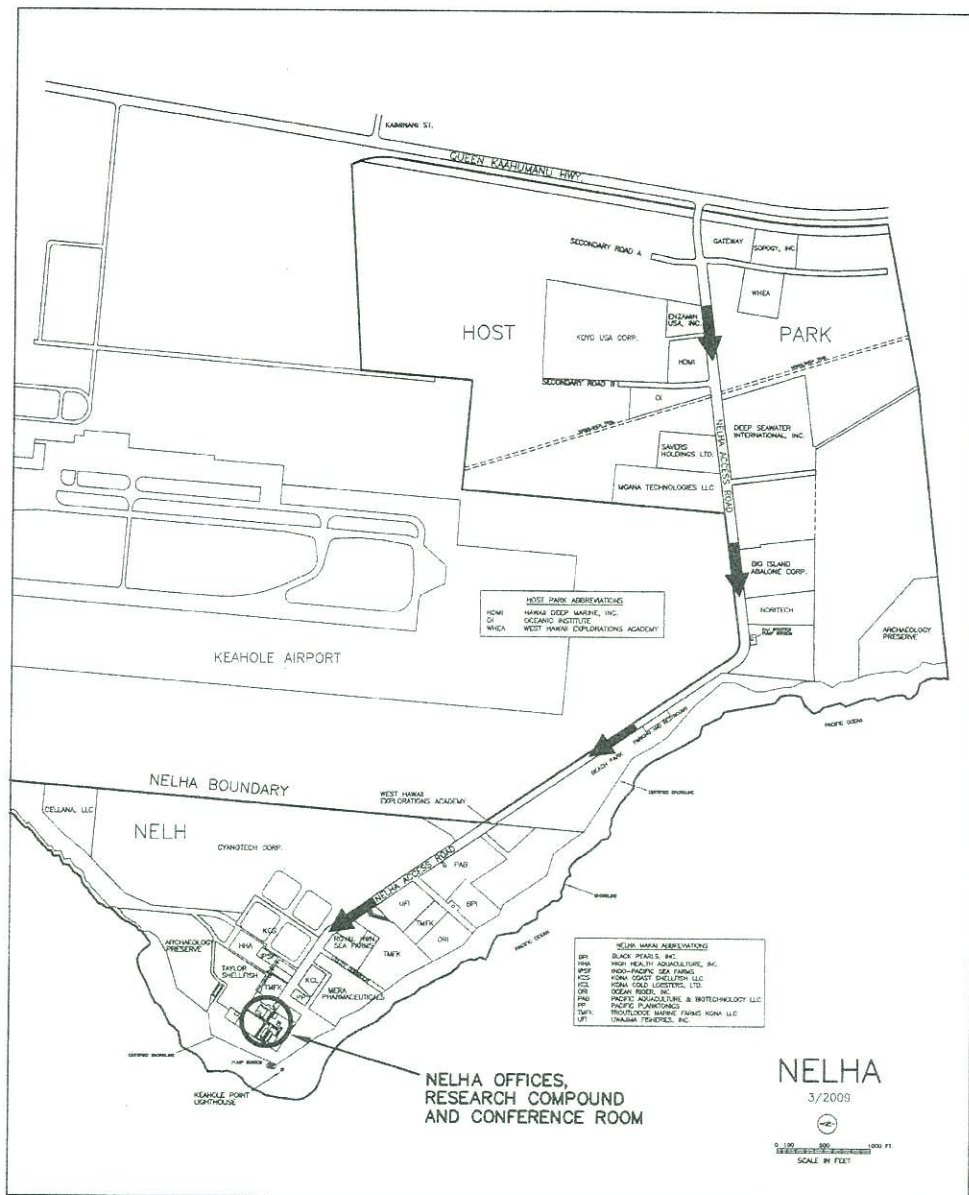

Registration Information: The workshop is generously sponsored by Gemini Observatory, TMT (Thirty Meter Telescope) with special thanks to Big Island Toyota, NELHA and the Mauna Kea observatories. A maximum of 70 teachers will be allowed to participate. Please contact Janice Harvey at Gemini Observatory, 974-2603, jharvey@gemini.edu for further information. The workshop is free.

To reserve space in the workshop please send an email with the following information to:
Andolie Marten, 975-2531, amarten@gemini.edu

Deadline for registration is September 20th, 2009.
